ABOUT ME

Software Engineering student pursuing a Backend Developer position, with project-based experience using Java, Spring Boot, RESTful APIs, security, relational databases, messaging, Docker, and AWS. Interested in building secure, maintainable backend services and contributing to real-world software development environments.

CORE SKILLS

Languages: Java, SQL, JavaScript, TypeScript

Backend & Security: Spring Boot, Spring Security, Spring Data JPA, Hibernate, RESTful APIs, JWT, OAuth2, Node.js, NestJS

Data & Messaging: PostgreSQL, MySQL, Redis, Kafka, Debezium, Supabase

Architecture & Cloud: Service-Based Architecture, Microservices, Event-Driven Systems, API Gateway, Outbox Pattern, Docker, AWS (ECS, ECR, S3, CloudFront)

Testing: JUnit, Mockito, Performance Testing (k6, JMeter), API Testing with Postman

Tools & Delivery: Git, GitHub, Maven, GitLab CI/CD

Frontend & Mobile: React, Next.js, React Native/Expo

Soft Skills: Problem Solving, Team Collaboration, Communication, Self-directed Learning

PROJECTS

Service-Based E-commerce Platform | Backend Developer | [View Project](#)

01/2026 – 05/2026

Tech Stack: Java, Spring Boot, Spring Cloud Gateway, PostgreSQL, Redis, Kafka, Debezium, Docker, AWS

- Developed a service-based backend with API Gateway and domain services for authentication, catalog, commerce, chat, and assistant features.
- Implemented an idempotent checkout orchestrator for validation, inventory reservation, order creation, and payment initialization.
- Integrated SePay with Outbox, Debezium, Kafka, and Redis-based payment expiration for reliable event-driven processing.
- Added JUnit/Mockito automated tests and k6/JMeter performance tests; containerized and deployed services through GitLab CI/CD, AWS ECR, and ECS.

Security Equipment E-commerce Website | Backend Developer | [View Project](#)

08/2025 – 11/2025

Tech Stack: Java, Spring Boot, Spring Security, JPA/Hibernate, PostgreSQL, Redis, JWT, OAuth2

- Developed RESTful APIs for product, cart, order, discount, payment, review, and user management modules.
- Implemented JWT authentication, role-based authorization, and Google/Facebook OAuth2 login, using Redis to store authorization requests.
- Built paginated product search and filtering by keyword, category, brand, price range, stock status, and active status.
- Improved checkout and discount handling, mapped relational entities with JPA/Hibernate, and tested APIs using Postman.

EDUCATION

Industrial University of Ho Chi Minh City

10/2022 – Present

Bachelor of Software Engineering - GPA: 3.69/4.0

CERTIFICATION

TOEIC Listening & Reading Certificate

06/2025

Score: 650+/990
